

Women's Hospital

The Women's Hospital is located on the Columbia St. Mary's Hospital Milwaukee campus and consolidates services for women, infants and children in one convenient location. With 111 licensed beds, it is the only healthcare system in the Milwaukee area to offer private newborn intensive care rooms for our tiniest and most vulnerable patients and their families.

In addition to the many services for women, infants and children, the Women's Hospital is also home to outpatient programs for Behavioral Medicine Services and the Sacred Heart Rehabilitation Institute's Brain Injury Day Treatment Program.
